BRAD WARREN <bradwarr@mac.com>

Jul 3

to john

Hi John,

If you have any time tomorrow to catch up, I'd love to learn more about RuBee and its potential applications in pot/trap fisheries. As I mentioned we see some strong interest in the idea for telemetry links on pots in the Alaska crab fleet.

I'm in Portland ME for a couple of days and my schedule has just opened up due to a last-minute change of plans. Wide open tomorrow and 4th—though I expect you are likely to have a very packed schedule with the holiday.

Might be easiest to connect via cell or this email address, which goes straight to cell.

Kind regards,
Brad Warren
